FOR IMMEDIATE RELEASE

Home Technology Consultants Selected for Design of Audio/Video System at Suwanee Estate

WATKINSVILLE, GA—Home Technology Consultants, a residential audio/video firm specializing in custom home integrated systems, has been awarded the contract for the design and engineering of A/V systems in a 40,000 square foot estate in Suwanee. This expansive project will include a state-of-the-art Crestron touchpanel integration system controlling whole-house audio and video distribution, home theater, climate, video surveillance, telecommunications, lighting, and security. It will also feature a custom biometric access control system.

“The Suwanee estate will be the benchmark of technology,” says Rick Montgomery, president and founder of HTC. “All systems in this house will be controlled with our exclusive user interface, which makes all electronic actions menu-driven and as easy to use as an automatic teller machine.”

Home Technology Consultants has been in the business of designing and installing custom-home integration systems in some of the finest houses in Georgia for over ten years. HTC specializes in home theaters, media rooms, listening rooms, multi-room sound systems, security and fire alarms, lighting control, telecommunication systems, local area networks, and integration management systems. While HTC is based in the Athens area, the majority of its work has been in Buckhead, Lake Oconee, Lake Burton and Highlands. HTC will be expanding into the Sea Island and St. Simons Island markets in early 2006. In addition, HTC has done three *Southern Accents* showcase homes over the last several years and will participate in the 2006 *Golf Digest* showcase home at Reynolds Plantation. Visit the Web site for a list of clients, as well as more information on HTC's work (www.hometechnologyconsultants.com).
